

## The Rode SmartLav+

The Rode SmartLav+ is specially selected to have high sensitivity and flat response up to 22kHz. This ensures it matches with the Focusrite Scarlett range of pre-amps. The microphone comes with a short SC3 cable that converts from a trrs jack plug to trs jack plug. The VXLR+ TRS jack to XLR incorporates a stepdown transformer to allow the SmartLav+ to be powered by the 48V phantom supply.
